A Step Ahead Since 1966

# KNOW YOUR SPA

# PATENTED DURAFRAME®

## MAINTENANCE-FREE CABINET & STEEL SUPPORT SYSTEM

### DuraFrame® Support System

This patented frame is constructed from powder-coated, galvanized steel, giving the spa additional durability and longevity.

### Reversible Synthetic Panels

Surrounding the spa are maintenance-free, synthetic polystyrene cabinet panels. The panels have a natural wood grain appearance and are reversible, which can be easily removed and flipped over if ever necessary. The synthetic wood will not split, crack, peel, or splinter, and is resistant to rot, insects, moisture and fading.
